

Entity Details:

Entity	Attributes	Primary Key	Foreign Key(s)
Users	UserID (int, PK), FirstName (nvarchar(100)), LastName (nvarchar(100)), Email (nvarchar(255), Unique), PasswordHash (nvarchar(255)), Role (nvarchar(20), Check: 'Organiser', 'Participant'), ProfilePictureURL (nvarchar(500), Nullable), DateCreated (datetime), DateOfBirth (date, Nullable)	UserID	-
Events	EventID (int, PK), Name (nvarchar(200)), Description (nvarchar(MAX)), Date (datetime), Location (nvarchar(200)), Distance (nvarchar(50)), EventType (nvarchar(20), Check: 'Run', 'Walk', 'Cycle'), CreatedByUserID (int, FK), IsActive (bit, Default 1)	EventID	CreatedByUserID -> Users.UserID
Categories	CategoryID (int, PK), EventID (int, FK), Name (nvarchar(100)), Description (nvarchar(255), Nullable)	CategoryID	EventID -> Events.EventID

Entity	Attributes	Primary Key	Foreign Key(s)
Enrolments	EnrolmentID (int, PK), ParticipantUserID (int, FK), EventID (int, FK), CategoryID (int, FK), EnrolmentDate (datetime), Status (nvarchar(20), Check: 'Pending', 'Confirmed', 'Cancelled')	EnrolmentID	ParticipantUserID -> Users.UserID, EventID -> Events.EventID, CategoryID -> Categories.CategoryID
Results	ResultID (int, PK), EnrolmentID (int, FK, Unique), FinishTime (time), FinishPosition (int), DateCaptured (datetime)	ResultID	EnrolmentID -> Enrolments.EnrolmentID
EventImages	ImageID (int, PK), EventID (int, FK), ImageURL (nvarchar(500)), IsBanner (bit, Default 0), UploadedDate (datetime)	ImageID	EventID -> Events.EventID

Important Constraints and Logic:

Role-Based Access: The Role field in the Users table is central to enforcing all permissions across the system.

Event Management: Only an Organiser (identified by CreatedByUserID) can manage their own events.

Enrolment Integrity: An Enrolment links a ParticipantUserID (which must be a User with the role 'Participant') to a specific Event and its Category. This prevents the same participant from enrolling in the same event twice.

Results: A Result is linked directly to an EnrolmentID. This ensures a participant's result is always connected to their specific enrolment, and one enrolment cannot have multiple results.
